5 - Proposed Solution

Explanation:

All automated remediation paths were unavailable. The steps above represent generic SRE triage protocol. Reason: Gemini not configured -- skipping to fallback.

Steps:

1. Identify and isolate the affected service or pod.
2. Collect recent logs and metrics for the incident window.

- 3. Check recent deployments or config changes that may have caused the issue.
- 4. Escalate to the on-call engineer with collected evidence.
- 5. Apply a rollback or hotfix once root cause is confirmed.
