Generated : 2026-05-30 19:59:22 UTC

Trace ID : ccec844a-6a53-485b-ae27-4cef08ccaa6d

1 - Incident Summary

Incident ID : ccec844a
Category : Security
Severity : SeverityLevel.FATAL
Source : OS
Cache : MISS

2 - Raw Log

2026-05-30 14:08:55 FATAL sshd: Too many authentication failures for invalid user admin from 192.168.1.77

3 - Classification

Category : Security
Severity : SeverityLevel.FATAL
Summary : SSH authentication failure for invalid user from remote host.
Source : OS

4 - Diagnosis

Root Cause : Weak SSH configuration, likely allowing password authentication and not sufficiently restricting access, enabled multiple brute-force attempts for an invalid user 'admin'.
Confidence : 90%
Reasoning : The log explicitly shows 'Too many authentication failures for invalid user admin' via SSH, directly indicating a brute-force attempt. The retrieved playbook specifically targets 'Weak SSH Configuration or Exposed SSH Daemon' and suggests disabling password authentication and restricting access, which directly addresses the observed vulnerability.
Source Tier : llm
Used History : No
Used Playbook : Yes

5 - Proposed Solution

Explanation:

Gemini unavailable; remediation derived from playbook 'Weak SSH Configuration or Exposed SSH Daemon on Nodes' (RAG confidence=0.5563). Review the playbook steps and adapt commands to the live environment before

execution.

Steps:

- 1. Audit `/etc/ssh/sshd_config` on affected nodes for insecure settings.
- 2. Disable `PasswordAuthentication`, `PermitRootLogin`. Enforce key-based authentication only.
- 3. Restrict SSH access to specific jump hosts/IPs via firewall rules or `AllowUsers`/`AllowGroups` in `sshd_config`.
- 4. Restart `sshd` service (`sudo systemctl restart sshd`). For nodes that don't require SSH, ensure `sshd` is stopped and disabled.

6 - Risk Assessment

Risk Level : RISKLEVEL.SAFE

Safe Commands (0):

(none)

Flagged Commands (0):

(none)

7 - Operator Decision

Decision : OPERATORDECISION.APPROVED

Executed At : 2026-05-30T16:59:22.490440+00:00

8 - Historical Context

Times Seen : 1

First occurrence -- no prior incidents.
