Generated : 2026-05-31 16:48:18 UTC

Trace ID : dedf8309-3d43-4d51-a69c-1bdf02223827

1 - Incident Summary

Incident ID : dedf8309
Category : Database
Severity : SeverityLevel.FATAL
Source : PostgreSQL
Cache : HIT

2 - Raw Log

```
[2026-05-27 09:15:44] ERROR [postgres-db-01] pid=9999 10.0.0.55:5432 FATAL: remaining connection slots are reserved for non-replication superuser
```

3 - Classification

Category : Database
Severity : SeverityLevel.FATAL
Summary : Connection pool exhausted on postgres-db-01
Source : PostgreSQL

4 - Diagnosis

Root Cause : Unable to determine root cause automatically -- manual investigation required.
Confidence : 10%
Reasoning : All diagnosis paths unavailable: Gemini not configured -- skipping to fallback.
Source Tier : safe_fallback
Used History : No
Used Playbook : No

5 - Proposed Solution

Explanation:

All automated remediation paths were unavailable. The steps above represent generic SRE triage protocol. Reason: Gemini not configured -- skipping to fallback.

Steps:

1. Identify and isolate the affected service or pod.
2. Collect recent logs and metrics for the incident window.

- 3. Check recent deployments or config changes that may have caused the issue.
- 4. Escalate to the on-call engineer with collected evidence.
- 5. Apply a rollback or hotfix once root cause is confirmed.

6 - Risk Assessment

Risk Level : RISKLEVEL.SAFE

Safe Commands (0):
(none)

Flagged Commands (0):
(none)

7 - Operator Decision

Decision : OPERATORDECISION.APPROVED
Executed At : 2026-05-31T13:48:18.449188+00:00
