

LogPulse AI - Incident Report

Generated : 2026-05-29 15:22:15 UTC

Trace ID : a766d9b8-41d7-4ccc-9cbf-ebaf4182091c

1 - Incident Summary

Incident ID : a766d9b8
Category : Memory
Severity : SeverityLevel.CRITICAL
Source : Kubernetes
Cache : MISS

2 - Raw Log

```
pod/worker-api OOMKilled exceeded memory limit 256Mi
```

3 - Classification

Category : Memory
Severity : SeverityLevel.CRITICAL
Summary : Kubernetes worker API pod killed for exceeding its memory limit.
Source : Kubernetes

4 - Diagnosis

Root Cause : The worker-api pod is consistently OOMKilled because its configured memory limit of 256Mi is insufficient for its operational requirements, leading to repeated resource exhaustion.

Confidence : 98%

Reasoning : The raw log explicitly states the pod was OOMKilled after exceeding its 256Mi memory limit. This is strongly supported by the incident history, which records 18 previous occurrences of this exact incident with the identical root cause: an insufficient 256Mi memory limit for the worker-api pod. The retrieved playbook also targets 'Insufficient Memory Limit' for OOMKilled pods.

Source Tier : llm
Used History : Yes
Used Playbook : Yes

5 - Proposed Solution

Explanation:

Gemini unavailable; remediation derived from playbook 'Pod OOMKilled: Insufficient Memory Limit' (RAG confidence=0.7930). Review the playbook steps and adapt commands to the live environment before execution.

Steps:

- 1. Verify the `OOMKilled` status using `kubectl get pod <pod-name> -o yaml`.
- 2. Check container memory usage metrics (e.g., Prometheus/Grafana) to identify peak memory consumption.
- 3. Analyze application logs for clues about memory spikes or growth patterns.
- 4. Increase the `resources.limits.memory` for the affected container in its Deployment/StatefulSet manifest.
- 5. Roll out the updated deployment using `kubectl apply -f <manifest-file>` or `kubectl rollout restart deployment/<deployment-name>`.
- 6. name: my-app

6 - Risk Assessment

Risk Level : **RISKLEVEL.SAFE**

Safe Commands (0):

(none)

Flagged Commands (0):

(none)

7 - Operator Decision

Operator rejected -- no execution.
