Generated : 2026-05-29 15:09:28 UTC

Trace ID : fc0cd8e4-9c78-4d18-b740-1dfe7d10b06f

## 1 - Incident Summary

**Incident ID :** fc0cd8e4  
**Category :** Database  
**Severity :** SeverityLevel.FATAL  
**Source :** PostgreSQL  
**Cache :** HIT

## 2 - Raw Log

[2026-05-27 09:15:44] ERROR [postgres-db-01] pid=9999 10.0.0.55:5432 FATAL: remaining connection slots are reserved for non-replication superuser

## 3 - Classification

**Category :** Database  
**Severity :** SeverityLevel.FATAL  
**Summary :** Connection pool exhausted on postgres-db-01  
**Source :** PostgreSQL

## 4 - Diagnosis

**Root Cause :** Unable to determine root cause automatically -- manual investigation required.  
**Confidence :** 10%  
**Reasoning :** All diagnosis paths unavailable: Gemini not configured -- skipping to fallback.  
**Source Tier :** safe\_fallback  
**Used History :** No  
**Used Playbook :** No

## 5 - Proposed Solution

### Explanation:

All automated remediation paths were unavailable. The steps above represent generic SRE triage protocol. Reason: Gemini not configured -- skipping to fallback.

### Steps:

1. Identify and isolate the affected service or pod.
2. Collect recent logs and metrics for the incident window.

- 3. Check recent deployments or config changes that may have caused the issue.
- 4. Escalate to the on-call engineer with collected evidence.
- 5. Apply a rollback or hotfix once root cause is confirmed.

6 - Risk Assessment

Risk Level : RISKLEVEL.SAFE

Safe Commands (0):  
(none)

Flagged Commands (0):  
(none)

7 - Operator Decision

Decision : OPERATORDECISION.APPROVED
